

HEATED GEAR

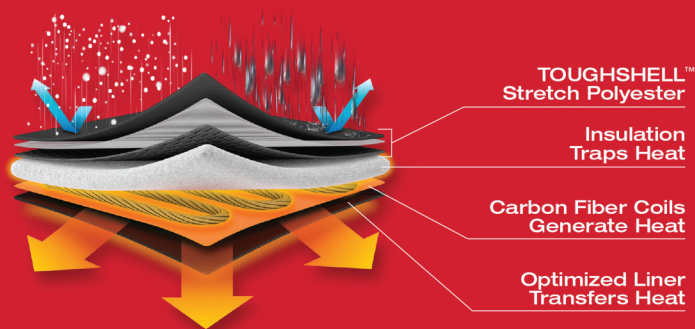

Advanced Heat Technology System™

Reducing the need to bulky layers, Milwaukee® Heated Gear products utilize carbon fiber heating elements to generate and trap heat across core body areas. Adjustable heat technology allows users to adapt to changing conditions by increasing or decreasing the heat level with the touch of a button.

Born out of necessity on sub-zero commercial jobsites and developed by teams of advanced engineers, MILWAUKEE® M12™ Heated Gear combines patented Carbon Fiber Heating Technology with the power and durability of M12™ REDLITHIUM™ Batteries to battle extreme temperatures.
